

Experience CATALANO STUDIO in Copenhagen!

Catalano Studio is placed in a commercial area that is considered one of the most strategic, attentive and sensitive to design's trends and influences worldwide.

Architects, designers, VIP clients and dealers who will visit this amazing Catalano's mono-brand flagship-store, will make Catalano Studio a privileged "observation point" for market evolution trends and for researching, revising and developing the design ideas of whole European frames of mind.

CATALANO

Catalano Studio is a ceramic-sanitary-ware planet that gives all visitors a great experience, like an ordinary bathroom store cannot do.

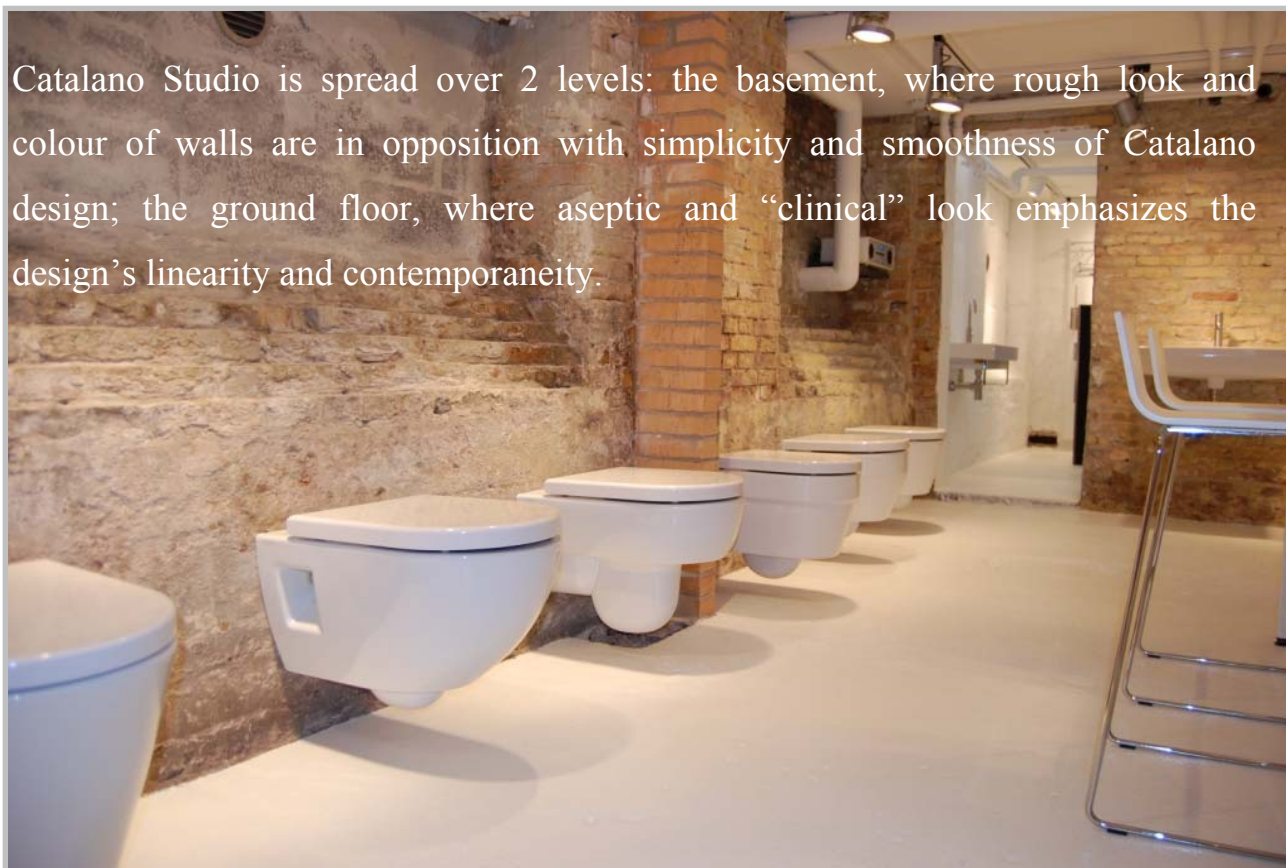

Here, every product has its right place and its proper setting.

The Studio is also a showroom, which can be used at any time by Scandinavian distributors to show Catalano's products to their customers.

Catalano Studio is spread over 2 levels: the basement, where rough look and colour of walls are in opposition with simplicity and smoothness of Catalano design; the ground floor, where aseptic and “clinical” look emphasizes the design’s linearity and contemporaneity.
