RECOR Cast Iron Baths are made in Portugal using Class A enamel which is totally resistant to acidic and alkaline products, keeps it's sparkle, smells do not linger on it and neither bacteria or fungi adhere to it, making the bathtubs highly hygienic and beautiful to touch and see.

They have an extremely high level of thermal and sound insulation making the water in the bath stay hot for longer and their surface is very smooth and easy to clean.

Painted in New Zealand, Plumblin can offer this range of baths in any colour imaginable and then coupled with either painted, chrome plate, gold plate, antique bronze, antique copper or brushed nickel feet, the possibilities are truly endless.

sf Special Feature: Bath exterior & feet can be painted any colour
