In 2000 the designs of Franco Sargiani achieved the absolute synthesis of expression, which undoubtedly places him among the giants of design. "For Acquatonica I envisaged an element which is completely integrated into the wall, taking up no space and with separate controls. The cut mirror effect gives transparency which, combined with the effects of reflections, is a recurrent theme of my designs. Here the shower is interpreted as the undisguised pleasure of being immersed in water, just like being in the rain"

SHOWERS
