ULTRA GLOSS BATHROOM CLEANER & POLISH | UG-375 | \$35
 • 375ml • For all bathroom surfaces
 • Ideally suited for use on porcelain, ceramics, acrylic, polymarble, tiles, mirrors, glass and all synthetic painted surfaces in the bathroom

CERAMIC, ENAMEL, ACRYLIC REPAIR KIT PURE WHITE | CRRK002 | \$99
STAR WHITE | CRRK005 | \$99
 • Suitable for baths, basins, showertrays, kitchen sinks • Easy to use
 • Minor damage to baths, basins or tiles can be easily repaired with this repair kit. Acting as a filler and a top coat, this makes it ideal for touching up ceramic, enamel, acrylic, metal, powder coated or painted surfaces. This robust, temperature resistant, industrial quality kit allows you to cost effectively deal with minor damage in your bathroom.

TOUCH UP STICK PURE WHITE | CRTU002 | \$55
STAR WHITE | CRTU005 | \$55
 • Minor damage to a basin or scratched tile can be very annoying, but the touch up kit deals with damage like this in no time.

RUBBER FOR CERAMIC, ENAMEL, AND PORCELAIN | CRBR | \$55
 • The gentle way to remove metal abrasions, stains, rust, limescale and paint marks on baths, basins, sanitary fittings, sinks, tiles and floors.
 • Grey metal marks from your watch strap or jewellery can cause stubborn stains in the bath or basin. It is often the case that when you try to remove extreme dirt or limescale, you damage the surface too. The Bath Rubber features polishing compounds that are specially tailored for ceramic and enamel surfaces providing an easy way to remove those residues without scratching.

FUGI KIT - SILICONE PROFILING TOOL | CRFK | \$39
 • The Fugi kit enables you to work all standard silicone materials professionally and with ease. First, remove the old, leaking or mouldy silicone joint then apply the new sealant and use our Fugi moulding angles to gradually remove the excess without the need of masking or reworking. The Fugi Kit also removes the need for a releasing agent meaning it is now no longer necessary to utilize soapy water or the 'wet finger' commonly used at present. Introducing moisture, when profiling silicone, induces fungal growth which we have all seen in the bathroom.
